PROFILE

Flutter-specialized mobile developer, with several successful experiences in designing and developing cross-platform applications integrating AI solutions. Mastery of the Flutter ecosystem, NestJS backend, and databases. Available for freelance assignments or a permanent position.

EDUCATION

Engineering cycle – 5th year 2023 – 2025

ESPRIT – Private Higher School of Engineering and Technology

Preparatory class MP (Mathematics–Physics) 2020 – 2023

IPEIT – Tunis Preparatory Institute for Engineering Studies

High School Diploma in Mathematics – Honors 2019

El Menzah 6 High School

PROFESSIONAL EXPERIENCE

Flutter Developer (Final Year Internship) 01/2026 – present

Value Digital, Tunis, Tunisia

- Development of new features and integration of AI models for an Employee Empowerment application, improving employee engagement and productivity.

Mobile Developer 07/2025 – 09/2025

MK Talent, Tunis, Tunisia

- Design and development of an educational mobile application integrating AI-driven personalized revision paths (LLaMA), with summary cards and adaptive quizzes, optimizing student learning efficiency.

Flutter Mobile Developer 06/2025 – 08/2025

Krenova Consulting, Nabeul, Tunisia

- Development of a complete e-commerce application in Flutter with an ExpressJS backend, integrating an AI recommendation engine and an optimized interface, thereby improving user experience and conversion rate.

React Frontend Developer 07/2024 – 08/2024

Belive Technology, Tunis, Tunisia

- Creation of a farm management application using ReactJS and ASP.NET Web API, ensuring an intuitive interface and efficient data management.

PROJECTS

PrimeProf Application 2025

Contribution to the development of PrimeProof, an educational mobile application built with Flutter, NestJS and PostgreSQL, integrating AI features to connect students and teachers, thereby improving communication and educational tracking.

Commercial platform for a cement plant (hackathon) 2024

Development of a sales management mobile application using Flutter, NestJS, Google Maps API and MongoDB, with point-of-sale mapping for real-time visit tracking and price updates.

Sports and nutrition coaching mobile application 2024

Creation of a mobile application in Kotlin with NestJS backend, MongoDB and the Gemini API, generating personalized sports and nutrition programs using AI, offering a tailored user experience.

Complete e-commerce application with dashboard 2025

Development of a full-featured e-commerce application with admin dashboard, built with Flutter, Firebase and Supabase, offering a smooth shopping experience thanks to integrated authentication and data management.

Community application for ESPRIT students (hackathon) 2025

Development of a Reddit-like social platform with Flutter and NestJS, integrating a live podcast and personalized recommendations via OpenAI to foster student interaction.

SKILLS

- **Main specialization:** Mobile development with **Flutter** (Dart).
- **Backend:** API development with **NestJS** and **TypeScript**.
- **Native Android:** Practical knowledge in **Kotlin**.
- **Databases:** Firebase (Firestore, Auth), Supabase, MongoDB, PostgreSQL, MySQL.
- **Tools:** Git, GitHub, Swagger, Postman.
