PROFILE

Full-stack software engineer specializing in Flutter mobile development and B2B SaaS platforms, with deep expertise in AI integration (RAG, LLM, embeddings). **6+ mobile applications shipped (iOS & Android)**, 9+ projects , 4 B2B SaaS platforms delivered, 4 professional experiences. ESPRIT graduate 2026. Available for freelance missions or permanent position.

EDUCATION

Engineering Degree in Software Engineering ESPRIT – Private Higher School of Engineering and Technology, Tunis	2023 – 2026
Preparatory Class MP (Mathematics–Physics) IPEIT – Tunis Preparatory Institute for Engineering Studies	2020 – 2023
High School Diploma in Mathematics – Honors El Menzah 6 High School	2019

PROFESSIONAL EXPERIENCE

Flutter Mobile Developer (Final Year Internship) Value Digital, Tunis, Tunisia	01/2026 – 07/2026
- Development of new Flutter features and integration of AI models for an Employee Empowerment mobile application, improving employee engagement and productivity. - Performance optimization and UX improvements across iOS and Android.	
Mobile Developer (Flutter) MK Talent, Tunis, Tunisia	07/2025 – 09/2025
Design and development of an educational mobile app integrating AI-powered personalized revision paths (LLaMA), with flashcards and adaptive quizzes, optimizing student learning efficiency.	
Flutter Mobile Developer Krenova Consulting, Nabeul, Tunisia	06/2025 – 08/2025
Development of a complete e-commerce application in Flutter with ExpressJS backend, integrating an AI recommendation engine and optimized interface, improving user experience and conversion rate.	
React Frontend Developer Belive Technology, Tunis, Tunisia	07/2024 – 08/2024
Development of an agricultural nursery management application with ReactJS and ASP.NET Web API, ensuring an intuitive interface and efficient data management.	

MOBILE PROJECTS

PrimeProf — Flutter Educational App Complete Flutter app with NestJS and PostgreSQL, integrating AI-powered student/teacher intelligent matching. Advanced state management, polished UI, push notifications. <i>Stack: Flutter, Dart, NestJS, PostgreSQL, OpenAI</i>	2025
Sports & Nutrition Coaching App Native Android Kotlin app with NestJS backend and Gemini API, generating AI-personalized sports and nutrition programs with detailed progress tracking. <i>Stack: Kotlin, NestJS, MongoDB, Gemini</i>	2024
E-commerce App with Admin Dashboard Complete Flutter e-commerce app with cart, payments, secure authentication and real-time data management. <i>Stack: Flutter, Firebase (Auth, Firestore), Supabase</i>	2025
Cement Plant Sales Platform (hackathon) Flutter mobile sales management app with real-time field visit tracking and live price updates. <i>Stack: Flutter, NestJS, Google Maps API, MongoDB</i>	2024
ESPRIT Community Platform (hackathon) Reddit-like mobile social platform with live podcast and personalized recommendations via OpenAI. <i>Stack: Flutter, NestJS, OpenAI</i>	2025

B2B SAAS PLATFORMS

InvoiceGuard — Duplicate Invoice & Payment Fraud Detection Stops supplier fraud before it costs you. 4-level PDF analysis: SHA-256 hash (100%), exact field match (95%), same period ±5% (70%), semantic HNSW similarity (99%). Real-time alerts ranked by confidence. <i>Stack: Next.js 15, NestJS, PostgreSQL, pgvector, Ollama, BullMQ, Redis, Stripe, Kubernetes, Docker</i>	2026
---	------

ContractPulse — Smart Contract Renewal Tracker with RAG Chat2026

Teams upload PDFs to AWS S3; platform extracts content, generates embeddings, answers any contract question citing the exact page. Automatic renewal alerts at 90, 30 and 7 days before expiry.

Stack: Next.js 15, NestJS, PostgreSQL, pgvector, Ollama, Groq, AWS S3, BullMQ, Stripe, Jenkins, Docker

ReviewLens — Semantic Customer Review Clustering & AI Insights2026

Turns hundreds of customer reviews into actionable insights. Auto-groups by theme (K-Means + Silhouette), generates per-cluster AI summary, sentiment score and concrete recommendation.

Stack: Next.js 15, NestJS, PostgreSQL, pgvector, Ollama, Python, scikit-learn, BullMQ, Docker

StandupFlow — Async Standup Automation for Tech Teams2026

Members submit updates via Slack or web app. Every morning, the manager gets an AI-generated email digest summarizing the whole team’s progress and blockers.

Stack: Next.js 15, NestJS, PostgreSQL, Groq, Slack API, Stripe, Resend, Sentry, Docker

SKILLS

- **Mobile (main expertise):** Flutter (Dart), state management (BLoC, Provider, Riverpod), animations, custom widgets, Kotlin (Jetpack), Swift (working knowledge)
- **Backend & Web:** NestJS, Next.js 15, TypeScript, REST API, Swagger, ExpressJS, ASP.NET
- **Databases:** PostgreSQL, pgvector, MongoDB, Redis, MySQL, Supabase, Firebase
- **AI & Pipelines:** Ollama (LLaMA), Groq, RAG / Embeddings, BullMQ, Python / scikit-learn, OpenAI, Gemini
- **Infra & DevOps:** Docker, Kubernetes, GitHub Actions, Jenkins, AWS S3, Stripe, Sentry
- **Tools:** Git, GitHub, Android Studio, VS Code, Postman, Figma
